Ahmed Mohamed Ahmed Shaker

Front-End Developer | React Developer | UI/UX Designer

Daqahlia, Egypt | 01006734678 | engxahmedshaker@gmail.com | linkedin.com/in/axshaker | Portfolio Website

PROFESSIONAL SUMMARY

Front-End Developer with 2+ years of practical experience building React.js and TypeScript web applications. Skilled in component-based development, REST API integration, and UI/UX design, with 3 live projects covering e-commerce platforms, client-side cryptography, and business websites. Focused on clean, user-centered, high-performance interfaces.

WORK EXPERIENCE

Full-Stack Developer

Mindly Social Media Company | Remote | 8 Months

- Built responsive desktop and mobile interfaces using reusable React.js components written in JSX.
- Partnered with design and marketing teams to improve website performance and user engagement.
- Delivered production-ready features for real-world client projects in a remote, cross-functional setting.

Freelance Front-End Developer

Self-Employed | Remote | Present

- Deliver React.js websites for clients, from requirements gathering to live deployment.

PROJECTS

ZEO | E-Commerce Platform

Live: zeo-nine.vercel.app | React.js, JavaScript, Tailwind CSS, Laravel, REST APIs

- Built a storefront for bags, perfumes, and beauty products with a categorized catalog, shopping cart, checkout, and customer authentication via Laravel REST APIs.
- Developed an admin dashboard for product, category, inventory, and order management with sales analytics and reporting.

CryptoGram | Zero-Knowledge Envelope Social Protocol & Cryptanalysis Workstation

Live: cryptogram-neon.vercel.app | React, TypeScript, Tailwind CSS, Web Crypto API

- Implemented 10 cryptographic algorithms (6 modern, 4 classical) for a simulated end-to-end encrypted social network.
- Engineered envelope encryption: AES-256-GCM encrypts posts client-side, RSA-OAEP wraps keys per recipient, and authenticated encryption detects tampering.
- Built ECDH + HKDF-SHA256 key exchange, ECDSA and RSA-PSS signatures, and a classical-cipher cryptanalysis module with attack simulations.

FORGE | Premium Gym & Fitness Website

Live: gym-beryl-xi-51.vercel.app

- Built a single-page site with 9 sections, 6 anchor-linked navigation items, and a scroll-driven feature section.
- Created reusable components: 6 program cards, trainer profiles, 3 pricing tiers, and 4 animated statistics counters.

EDUCATION

Delta University | Faculty of Artificial Intelligence — 2024 – Present

TRAINING

- **NTI Scholarship** – Internship
- **Online Courses** – Web Development & Front-End Technologies

TECHNICAL SKILLS

Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, JSX, Component-Based Development, Single-Page Applications
Styling & UI: Tailwind CSS, Flexbox, CSS Grid, Responsive Web Design, UI/UX Design, Performance Optimization
Tools & Integration: REST APIs, Git, GitHub, Vite, npm, Vercel
Web Security: Web Crypto API, Client-Side Encryption, Key Management, Digital Signatures, Cryptanalysis

LANGUAGES & SOFT SKILLS

Languages: Arabic (Native), English (Very Good)
Soft Skills: Communication, Teamwork, Fast Learning, Time Management, Attention to Detail
