Ahmed Mohamed Ahmed Shaker

Front-End Developer | React Developer | UI/UX Designer

Daqahlia, Egypt | 01006734678 | engxahmedshaker@gmail.com | linkedin.com/in/axshaker | Portfolio Website

PROFESSIONAL SUMMARY

Front-End Developer and React Developer with 2+ years of practical experience building responsive web applications with React.js, JavaScript (ES6+), and TypeScript. Built and deployed 3 live web projects, including an applied cryptography platform, and worked remotely as a Full-Stack Developer at Mindly Social Media Company. Combines UI/UX principles, component-based development, and technical problem-solving to deliver clean, user-centered interfaces for real-world freelance clients.

WORK EXPERIENCE

Full-Stack Developer
Mindly Social Media Company | Remote | 8 Months

- Delivered 8 months of remote front-end development, building responsive interfaces for desktop and mobile with React.js.
- Built dynamic, interactive user experiences using reusable React.js components written in JSX.
- Partnered with 2 cross-functional teams, design and marketing, to improve website performance and user engagement.
- Contributed to real-world client projects, delivering professional, production-ready web solutions.

Freelance Front-End Developer
Self-Employed | Remote | Present

- Deliver front-end projects for various clients, building responsive websites with React.js and modern web technologies.
- Take projects from requirements to live deployment, focusing on responsive layouts, usability, and performance.

PROJECTS

Azaban | Perfume Brand Website
Live: purple-bear-616763.hostingersite.com

- Developed a modern, responsive website interface for the Azaban perfume brand across desktop, tablet, and mobile.
- Focused on user experience and performance optimization to deliver a smooth, fast browsing experience.

CryptoGram | Zero-Knowledge Envelope Social Protocol & Cryptanalysis Workstation
Live: cryptogram-neon.vercel.app | React, TypeScript, Tailwind CSS, Web Crypto API

- Implemented 10 cryptographic algorithms (6 modern, 4 classical) in an academic research and simulation workstation.
- Engineered envelope encryption for a simulated end-to-end encrypted social network: AES-256-GCM encrypts posts and messages client-side, RSA-OAEP wraps keys per recipient, and authenticated encryption detects tampering.
- Built ECDH + HKDF-SHA256 key exchange, 2 signature schemes (ECDSA, RSA-PSS), and client-side key management.
- Developed a cryptanalysis module with Caesar, Vigenère, Playfair, and Enigma ciphers plus educational attack simulations.

FORGE | Premium Gym & Fitness Website
Live: gym-beryl-xi-51.vercel.app

- Designed and built a single-page gym website with 9 content sections and 6 anchor-linked navigation items.
- Built reusable UI components, including 6 training program cards, trainer profiles, and 3 membership pricing tiers.
- Implemented a scroll-driven feature section and 4 animated statistics counters within a fully responsive interface.

EDUCATION

Delta University | Faculty of Artificial Intelligence — 2024 – Present

TRAINING

- **NTI Scholarship** – Internship
- **Online Courses** – Multiple courses in Web Development & Front-End Technologies

TECHNICAL SKILLS

Front-End Development: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, JSX, Component-Based Development, Single-Page Applications
Styling & UI: Tailwind CSS, CSS Flexbox, CSS Grid, Responsive Web Design, UI/UX Principles, Performance Optimization
Development Tools: Git, GitHub, Vite, npm, Vercel
Web Security & Cryptography: Web Crypto API, AES-256-GCM, RSA-OAEP, ECDH, HKDF-SHA256, ECDSA, RSA-PSS, Digital Signatures, Cryptanalysis

LANGUAGES & SOFT SKILLS

Languages: Arabic (Native), English (Very Good)
Soft Skills: Communication Skills, Teamwork & Collaboration, Fast Learning, Time Management, Creativity & Attention to Detail
